

*Since 1965 designing and manufacturing  
rubber metal anti-vibration mounts*

# Quality, Environment and Safety Policy

Quality, Environment and Safety Policy is explained in a document issued by General Management.

It takes into consideration context, expectations of interested parties and of company strategy.

Content as follows:

## Our goals

- To become an important producer of metal rubber anti vibration mounts offering competitive, high quality products delivered in requested time.
- Gain full trust of our customers, thanks to fair, transparent and long-lasting cooperation.
- Put in place a competitive model based on maximum quality and efficiency, respect for environment and safeguard of workers safety.

## Our commitment:

To guarantee high performance level by:

- Strictly applying Quality Management System according to norm UNI EN ISO 9001 and Environment Management System according to norm UNI EN ISO 14001
- Fulfilling conformity obligations in the field of Environment and Safety
- Setting goals once per year and keeping them under control
- Constantly enhancing, motivating and improving skills of our staff
- Intensively training, informing and sensitizing our staff. This way our workers can operate in safety conditions, in respect of environmental norms and according to technical specifications set to guarantee the best possible quality level
- Continuously improving our production process, within the frame of a sustainable development, putting the proper attention to preservation of natural resources and minimizing or deleting negative environmental effects and risks connected with our industrial activity and life cycle of our products
- Fulfilling requests of customers, workers and other interested parties
- Cooperating with our suppliers to identify improvement opportunities, not only in the production process but also in environment, safety and health in workplaces
